Radiation Protection Shields

ECOLAB®
Everywhere It Matters.™

Ecolab®

Everywhere it Matters

We make the world cleaner, safer and healthier. We protect vital resources. Ensure water and energy are available everywhere. Our products and services prevent disease and infection. Keep food supplies safe. Protect the places where people eat, sleep, work, play, and heal.

We touch what is fundamental to quality of life: We keep people healthy. We enhance well-being. We provide assurance, so life can be lived fully. We help our customers succeed. Reduce risk and worry. Free them to grow.

EQUIPMENT DRAPES

**MICROSCOPE DRAPES / C-ARM DRAPES /
ULTRASOUND SOLUTIONS**

For more than two decades, the Ecolab® Microtek™ brand has provided innovative solutions to help reduce the risks of infectious disease transmission; to help protect healthcare workers in every type of clinical environment; and to help improve clinical outcomes by maximizing the protection available for both patients and medical professionals during procedures.

PATIENT TEMPERATURE MANAGEMENT

INTRATEMP™ / HUSH-SLUSH™

The IntraTemp Fluid Warming System from Ecolab® provides immediate access to warm irrigation fluid at a visible and controlled temperature to increase patient safety to reduce the risk of hypothermia. Hush-Slush Systems deliver velvet-soft surgical slush which improves patient safety and saves valuable nursing time.

SURGICAL ROOM TURNOVER

CLEANOP™

The CleanOp Operating Room turnover kit is an established industry standard that today features one of the industry's most exciting innovations: Mojave™ super absorbent disposable linens. CleanOp improves efficiency and helps deliver improved standard of care in every operating room setting.

PROTECTION FROM SCATTER RADIATION

DRAPE ARMOUR™

Drape Armour offers effective protection from scatter radiation, you can now choose the Drape Armour shielding that's ideal for you.

High quality OR Solutions

Designed to protect, save time and costs

Ecolab

Our vision keeps us focused on what we strive for - to be the global leader in water, hygiene and energy technologies and services; providing and protecting what is vital: clean water, safe food, abundant energy and healthy environments.

PATIENTS

Ecolab aims to provide innovative patient temperature management and infection prevention solutions. We strive to focus on increasing patient safety, improving outcomes and saving time.

EQUIPMENT:

Ecolab Microtek aims to provide best in class equipment drapes that covers all equipment in the operating room by working with users, equipment manufacturers and other stakeholders. We strive to ensure optimal protection for expensive equipment while ensuring ease of use and sterility within the operating room

STAFF

Innovative, enterprise-wide health, quality and safety protection solutions to optimize efficiency, lower total costs and improve patient satisfaction and staff engagement scores.

Microscope drapes

Covering every Microscope for more than two decades

Ecolab Surgical has worked in partnership with customers and leading manufactures to focus on providing you with best in class imaging technology. Ecolab Surgical has developed and tested drapes for many years, and covers thousands of microscopes every day based on the premise that you need the best to do the best.

MICROTEK ANGLED GLASS LENS: #1 in spectral reflectance (glare)

This test uses a spectrophotometer to measure the consistency of the light reflected off of the surface of a lens. If various wavelengths pass through the lens material differently, the image will be out of focus. A lower test result means a lens that will allow more light to pass through it.

Vari-Lens 2 and our patented Armatec™ range offers just that. Make sure you contact us for a free trial or a consult with one of our sales advisors.

- Higher scratch resistance
- Improved light transmission
- Reduced glare
- Enhanced definition (resolution)

From every angle, the Vari-Lens 2 Microscope Drape starts with visible optical excellence, as demonstrated by an independent laboratory test.

Our Offer	Your Benefit
Optical excellence	Perfect quality of vision
Wide range of covers	One high quality supplier for all your needs
Easy draping solution for every microscope	First time right, quick draping solution, saving valuable time

Our Lenses...

an evolution to optical excellence

Flat Lens

Polystyrene Lens providing sterile barrier and to cover basic optical and needs

Clear Lens

Curved Polycarbonate Lens providing sterile barrier and covering higher optical needs

Vari-Lens

Angled Coated Glass Lens featuring unique rotational option providing proven best in class optical quality

Vari-Lens2

Angled Coated Glass Lens combining proven best in class optical quality and cost effectiveness

Armatec

Innovative housing concept specially designed for Leica microscopes featuring a 'click' closure for secure attachment on the objective with an angled coated glass lens.

C-arm drapes

From brand specific to universal solutions

Ecolab Surgical has the widest range of solutions for all your draping needs within the Healthcare setting. From unique Hybrid OR's to the latest mobile C-Arms we ensure that you have the best solutions from a single source.

Adjustable C-arm Clip Drape

<http://youtu.be/AHp54UqARi4>

This innovative concept offers you a sterile C-arm drape that can be quickly applied by one person only, enhancing speed and efficiency. The adjustable clips are easy to apply onto each C-arm. The smart lock system ensures maximum safety and security. The unique adjustability of the clips makes the drape universal to almost all common known mobile C-arms.

C-arm Springbow Drape

<http://youtu.be/2orIDD-lbbk>

This brand specific draping solution offers a perfect and close fit for both Siemens and Philips C-Arm solutions.

Maximising Efficiency.
Minimising Risk.

Hybrid OR

Integrating capabilities. Expanding opportunities. The new Hybrid OR.

As healthcare evolves, so does the need for flexibility, efficiency and safety. Ecolab helps you to do more and work safely in the multidisciplinary environment of the Hybrid OR.

Today, the Hybrid OR is a flexible environment with a suite of enhanced capabilities that enables to perform complex endovascular procedures and provide exceptional patient care by bringing open and endovascular surgery into one room.

Tomorrow's Hybrid OR will follow the trend of requiring even more flexibility and expanding opportunities by implementing Neuro/Spine and Orthopedic procedures and other applications like Trauma Surgery in the Hybrid Suite.

In order to make these emerging technologies work in the OR, Ecolab cooperates with the leading OEM companies to provide sophisticated draping solutions,

helping clinical staff create a safe sterile environment.

Traditionally a category leader in equipment covers we offer the widest range of covers for every need, and offer first to market solutions to ensure that every innovative equipment that's new on the market can be appropriately sterile draped. In line with this vision, Ecolab developed a comprehensive line of draping

solutions specially designed to accommodate the unique needs of the diverse procedures performed in today's Hybrid OR.

With Ecolab's Hybrid versatile OR draping solutions supporting new imaging modalities & technologies, your patients and your equipment are protected. Ecolab brand Hybrid OR draping solutions should be standard practice in every facility.

Hybrid C-arm Drape

<http://youtu.be/WcDVnKwe1lw>

In order to make these emerging technologies work in the operating room, Ecolab Surgical cooperates with the leading OEM (Original Equipment Manufacturer) companies to provide sophisticated draping solutions, helping clinical staff create a safe sterile environment.

Cooperation is key

We aim to be the missing link between end-users and equipment manufacturers, providing total draping solutions for hospitals and the medical equipment used in them. Our focus is making technology work effectively in the OR.

The RCD-100 Robotic Column Drape has been awarded an AORN Seal of Recommendation.

Dedicated design.
Easy to use.
Prevents cross contamination.

Robotic draping solutions

Robotic Column Drape for the da Vinci™ S & Si Series

"Creation and maintenance of a sterile field can directly influence patient outcomes."* Your surgical team invests a great deal of time and resources into maintaining the sterile field of your OR suite.

And yet, many facilities leave a vulnerable area of their robotic surgical systems exposed. With Ecolab's new RCD-100 Robotic Column Drape we offer you a comprehensive solution to fill that gap.

THE ROBOTIC COLUMN DRAPE (RCD-100) IS THE ONLY DRAPE ON THE MARKET WHICH:

- ▲ Provides patented draping protection for the da Vinci® S & Si robotic column (a \$2M+ clinical investment)
- ▲ Provides clinical and patient protection, minimizing cross contamination
- ▲ Helps to reduce cleaning and turn-over time as a result of having a drape that provides full coverage of the robot base and stand

*AORN'S recommended practices for sterile technique

Protect the Sterile Field

For procedures involving the da Vinci S & Si systems, the robot's column—which is often right up against the OR table—is left completely uncovered. For this reason, we've developed a drape that Intuitive Surgical endorses for use with their da Vinci S series products.

The RCD-100 drape maintains the sterile field, providing patient and clinical protection.

Research has shown that only 25% of high touch objects are cleaned between cases.

AORN JOURNAL

SSI's are responsible for approx. 25% of the estimated 2 million HAIs each year.

The global leader
in protective
probe covers

Ultrasound probe cover solutions

The right solution

The most important advantage of Ultrasound probe cover products is the risk minimisation of infectious disease transmission to patients or medical staff. Whatever branch of medicine, wherever ultrasound is used, Ultracover™ offers the proper solution.

ADVANCED TECHNOLOGY

The latex-free Ultracover™ range is manufactured from an innovative polyisoprene formula and utilises an advanced technological manufacturing process. The result is a protective cover whose ease of use and performance is identical to that of a top quality 100% latex protective cover. The molecular structure of polyisoprene is so close to that of natural rubber latex that the latex-free Ultracover™ range fits and feels like latex protective covers. The difference is that this advanced range of products is 100% synthetic and therefore does not contain any natural rubber latex protein allergens or impurities.

A COMPLETE RANGE

Ultracover™ offers you a complete range of disposable protective covers for safe and hygienic use of ultrasound transducers. The extensive range of Ecolab Ultracover™ protective covers consists of high-quality, user friendly, latex-free products.

ADHESION PROBE COVERS

The innovative probe cover has an adhesive tip that secures the probe cover to the transducer. This reduces time needed to prepare the transducer for procedures. By not having to include gel on the inside of the cover, the hassle of cleaning the transducer after the procedure is eliminated.

Adhesion™ Probe Covers

With an adhesive tip that secures the probe cover to the transducer, these covers enhances speed and ease of use.

Compared to the traditional covers, the Adhesion cover reduces time needed to prepare the transducer for procedures. By not having to include gel on the inside of the cover, the hassle of cleaning the transducer after the procedure is eliminated.

- ▲ Easier to use
- ▲ Medical grade adhesive secures cover to transducer
- ▲ Easier to clean up
- ▲ No change in image quality
- ▲ No gel needed inside the cover
- ▲ No remaining residue on the transducer

Camera drapes

Clear vision, extreme flexibility and patient safety

This innovative line of Camera and Laser Arm Drapes has been designed with three key priorities: patient safety, clear vision and extreme flexibility. Quick and easy to turn-around from one procedure to another, they offer clinical staff every advantage in performance and ease of use.

Our camera drapes ensure sterility and protect equipment during procedures, and are available in a wide variety of shapes, sizes, and styles such as elasticized tips, perforated tips and closed systems.

Our closed system Coupler Camera Drape allows multiple endoscope exchanges without breaking the sterile field. As such, Ecolab is your place for “one-stop-shopping” for all your equipment drape needs.

Our Offer	Your Benefit
Unique closed system camera drape	Interchangeable during surgery without breaking the sterile field
Wide range of camera covers	One high quality supplier for all your needs
Universal draping solution	Covering 100% of your needs
All products offered are latex-free	No risk to patients and staff

* non-sterile

"I can exchange endoscopes without breaking the sterile field"

RECOMMENDED DRAPING TECHNIQUE

1. Scrub nurse inserts hand inside drape and holds Transfer-Stick for preparation of camera attachment to coupler.

2. While the scrub nurse holds Transfer-Stick, circulating nurse attaches camera to coupler.

3. Double check security of camera attachment. Camera release should be placed perpendicular to release on coupler drape (prevents accidental detachment during use).

4. Circulating nurse unfolds the telescopically folded drape by grasping the pull ties and pulling the drape over the camera and power cord.

5. Scrub nurse removes Transfer-Stick and discards.

6. Endoscope can now be placed inside coupler for surgical use. Endoscope can be changed as needed by releasing locking device on coupler drape.

Banded bags

Always the perfect fit with our wide range of banded bags

At Ecolab, we have a simple philosophy. Every equipment drape should have a perfect fit. Made with clear polyethylene material for visual clarity. Microtek brand banded bags are sterile, single-use, multipurpose coverings with elasticized openings and no frayed edges. Quick and easy to fit over a variety of OR equipment, each bag can be easily identified by a conveniently located label. These banded bags are ideal for a broad range of applications in the OR, angiography room, and cath lab.

Our Offer	Your Benefit

2 PATIENT TEMPERATURE MANAGEMENT

Improved patient safety and
shortened hospital stays

Patient Safety.
Temperature control.
Ease of use.

Scan code for Intratemp™ video

IntraTemp™

Continuous warm irrigation fluid at constant and safe temperature

Even mild inadvertent hypothermia can increase post-anesthesia recovery time, blood loss and morbid cardiac outcomes, and lengthen hospital stays.¹ The IntraTemp Fluid Warming System provides immediate access to warm irrigation fluid at a visible and controlled temperature. IntraTemp increases patient safety and reduces the risk of hypothermia, when used as part of a comprehensive normothermia protocol.

Maintaining normothermia should include the use of warm irrigation fluid for surgical procedures. AORN states that surgical staff should know the exact temperature of irrigation fluids at the time of instillation.²

1. Association of periOperative Registered Nurses (AORN) Recommended Practices Committee. Recommended practices for the prevention of unplanned perioperative hypothermia. AORN J. 2007 May; 85(5): 972-988

2. Association of periOperative Registered Nurses (AORN). Perioperative Standards and Recommended Practices: For Inpatient and Ambulatory Settings. AORN 2012 Edition, page 371.

1 Snap-In ThermoBasin™ and Drape Technology

- ThermoBasin™ safely activates the warmer once snapped into place
- Large 6.0 liter, puncture-resistant molded basin
- Integrated basin and drape come as a single sterile item
- Volume graduation marks on the inside of the basin

2 Fluid Temperature Display

- Temperature reading can be seen underneath the drape
- Temperature can be set between 37°C and 43°C

3 Upper Basin Indicator Light

- The green "Power On" indicator light glows to indicate that power is available to the upper basin heater and that a ThermoBasin™ is properly installed for use

4 Built-In Pocket Warmers

- Two pocket warmers on the side to warm extra fluid

5 Drain tank

- Catch any fluid that might accidentally get spilled. Easy to empty fluid from the tank

6 Mobile

- Caster wheels allow for easy transportation and lock to minimize inadvertent movement

BENEFITS

- ▲ Reduced risk of hypothermia
- ▲ Patient safety
- ▲ Easy set up
- ▲ High efficiency
- ▲ Sterile

IntraTemp™	Provides You
Immediate access to warm irrigation fluid	<ul style="list-style-type: none"> ▲ Continuously warm fluid immediately accessible at the point of use ▲ Reduced need to leave the operating room to retrieve warm bottles of solution ▲ No need for labelling and rotating saline bottle inventory in warming cabinets
Easy setup and operation	<ul style="list-style-type: none"> ▲ Safe and simple to use snap-in ThermaBasin™ and Drape technology ▲ Graduation marks on the basin means fluid volumes can be easily monitored ▲ Large capacity basin is puncture-resistant, especially to surgical instruments
Comply with AORN standards for temperature control and verification	<ul style="list-style-type: none"> ▲ Confirmation of fluid temperature at point of use ▲ Confidence that warm fluid is always at the proper temperature ▲ Minimized risk of patient injury due to exposure to hot fluids

Hush-Slush™ Systems

Velvet Soft Surgical Slush for Tissue Cooling

During procedures requiring topical cooling, Hush-Slush Systems from Ecolab® deliver velvet soft slush which improves patient safety and saves valuable nursing time. The proprietary Auto-Stir™ technology in Hush-Slush Systems automatically stirs the solution while cooling and eliminates concerns with crushed ice that may have sharp edges which can cause trauma to delicate tissues.

MINIMIZE THE RISK OF TRAUMA TO DELICATE TISSUES

- ▲ Produces a high quality velvet soft surgical slush
- ▲ Reduces the likelihood of damaging tissue due to large or sharp ice particles

SAVE VALUABLE NURSING TIME

- ▲ Auto-Stir inside the basin automatically stirs the fluid as it cools
- ▲ Produces soft slush easily and efficiently to save nursing time
- ▲ No need to crush sterile ice manually

EASY TO OPERATE AND MAINTAIN

- ▲ Controls are simple and easily operated by the nurse in the sterile field
- ▲ Does not require an alcohol transfer medium like other slush systems
- ▲ Quiet system does not disrupt the operating room environment
- ▲ Optional Fluid Warming System can be attached to the side of the Hush-Slush Systems for convenience

Sterile surgical slush made by Hush-Slush System.

Surgical Slush is used in over 80% of all transplants and CABG procedures in the United States for over 20 years. As the leader in surgical slush machines, the patented Ecolab Hush-Slush Systems are the right technology for surgical procedures requiring rapid cooling of tissue or organs. Backed by the personal service and support you've come to expect from Ecolab, a respected leader in infection control solutions, you can be confident with your choice for surgical slush.

1 Slush Basin with Auto-Stir™

- ▲ Auto-Stir device automatically stirs and creates velvet-soft slush
- ▲ Available in standard round 7.5 liter

2 Sterile Disc-Drape™ Technology

- ▲ Disc-Drape snaps onto the Auto-Stir device inside the basin
- ▲ Drape can cover both slush and optional fluid warming systems
- ▲ Available in multiple sizes for optimal sterile coverage

3 Power and Auto-Stir Controls

- ▲ Easily controlled within the sterile field

4 Optional Ecolab Fluid Warming System

- ▲ Attaches to the side of the Hush Slush Systems
- ▲ Continuous access to warm irrigation fluid at controlled temperatures

5 Quiet Operation

- ▲ No disturbance to operating room staff

6 Mobile

- ▲ Caster wheels allow for easy transportation and lock to minimize inadvertent movement

Applications

- ▲ Organ Transplantation
- ▲ Cardiology
- ▲ Other Applications

3 SURGICAL ROOM TURNOVER

Enhanced Cleaning Performance.
Reduced Turnover Time.
Improved Operational Efficiency.

EnCompass™ Operating Room Program

A Comprehensive Approach to Environmental Hygiene in the OR

Studies show that the environment plays a direct role in the transmission of infections. A major contributing factor is the number of contaminated high-touch surfaces that patients and clinicians come into contact with each day. Ecolab's EnCompass™ Environmental Hygiene Program with CleanOp room turnover products takes a focused approach to OR cleaning and turnover that provides healthcare facilities with a complete program designed to improve cleaning outcomes. In addition, CleanOp products address turnover efficiency. Combined, they improve the OR environment by:

- ▲ AORN Seal of Recognition Training on best in class cleaning practices
- ▲ Standardized room turnover processes
- ▲ Objective monitoring and reporting
- ▲ Clinically tested single use microfiber cloths, mops and other tools
- ▲ Precise chemical dispensing accuracy and delivery

Improve Efficiency with Standardized Processes, Simplified Product Use and Training

Implement Consistent Practices Across Multiple ORs with CleanOp Turnover portfolio
Featuring Microfiber Products, EnCompass Equipment and Tools

Measure Outcomes and Drive Continuous Improvement with the EnCompass® Monitoring System

Starting With the End in Mind - Delivering Objective Cleaning Results

Measuring your staff's effectiveness is critical to delivering improved cleaning outcomes. With a focus on high touch object cleaning, Ecolab's EnCompass™ OR Monitoring Program uses the patented DAZO® fluorescent marking gel to objectively measure thoroughness of disinfection cleaning on critical surfaces. The cleaning outcome data and observational information is captured on an iPod® handheld device and wirelessly transmitted to a secure database from which real-time data and customized reports can be generated. The reports help drive continuous improvement and provide compliance to current guidelines and industry recommendations.

DAZO® FLUORESCENT MARKING SYSTEM

- ▲ Includes DAZO® Fluorescent Gel applicators, UV lights with customized sampling plan
- ▲ Provides quantitative feedback on high-touch surface cleaning
- ▲ Use as an effective teaching/training tool
- ▲ Apply clear marker to high-touch surfaces and assess with a black light after cleaning
- ▲ One applicator can be used on 15-20 high-touch surfaces per room
- ▲ Assess outcomes with industry-accepted methodology, based on Dr. Philip Carling research

DATA COLLECTION

- ▲ iPod® handheld device with pre-loaded monitoring application for easy tracking and reporting
- ▲ DAZO® Monitoring Application
- ▲ Easy to use, WiFi-enabled

REPORT GENERATION

- ▲ Real-time reporting via on-line portal
- ▲ Trend analysis and benchmarking ability
- ▲ Customized reporting capabilities
- ▲ Allows for data to drive critical decisions

Empower Your Staff to Improve Efficiency and Cleaning Outcomes

Efficient Operating Room turnover is critical to the success of any hospital. Ecolab's EnCompass™ tools and processes with CleanOp portfolio featuring microfiber products are designed to improve cleaning efficiency and minimize the risk of cross-contamination. Advanced microfiber technology reduces water and chemistry usage while effectively cleaning and disinfecting surfaces. This technology also reduces lint in the OR

CLEANOP™ DISPOSABLE LINENS

- ▲ Improve OR turnover time with streamlined products and tools
- ▲ Customized solution with the components that work for your OR, including: Mojave™ Super-Absorbent Linens, armboard covers, pillowcases/headrest covers, wipes, bags and mops
- ▲ Training on product usage that helps staff turn the OR in less time

DISPOSABLE MICROFIBER CLEANING CLOTHS

- ▲ Improve cleaning efficiency and effectiveness
- ▲ Tested with dispensing system and disinfectant to deliver the appropriate disinfectant level to surfaces

DISPOSABLE MICROFIBER MOP

- ▲ Light and superior gliding characteristics
- ▲ Even wetting of surfaces improves mopping efficiency
- ▲ Low in-use cost
- ▲ Reduces water and chemistry use
- ▲ Reduces weight of disposal

ENCOMPASS™ CLEANING STATION

- ▲ Position products and buckets to individual preference using flexible configurations
- ▲ Access products and supplies easily with color-coded bucket system
- ▲ Extremely smooth and quiet design

ENCOMPASS™ SWEEP SET

- ▲ Eliminates bending to remove surgical debris from floor
- ▲ Easy to clean and disinfect to avoid cross contamination

CleanOp™ Disposable Linens

Superabsorbent sheets improve infection prevention techniques

CleanOp is a complete system specifically designed for the hygienic protection of the operating table and ancillary items. Hygiene improvement is crucial in the fight against Healthcare Associated Infection (HAI). CleanOp is an innovative protective cover system developed by Ecolab that helps infection prevention and at the same time increases the life expectancy of valuable OR table and mattresses.

Ecolab Surgical CleanOp™ System consists of multiple single-use components that are designed to protect Operating Tables, Armboards and Headrests from fluid contamination.

By introducing CleanOp™ as a routine part of operating theatre procedure, staff will save time cleaning following surgical interventions and improve not only the quality of care to their patients but also to that of the equipment.

Offers and Benefits

Our Offer	Your Benefit
Single Use	Added protection to help prevent cross contamination
Ecolab Cover System	Can help to reduce time to clean and disinfect between cases
Covers the whole operating table or stretcher	Keeps the operating table / stretcher clean, helps reduce mattress replacement costs and offers improved protection against HAIs
Patient transfer sheet	Simple and secure patient transfer
Absorbant Surface	Surface remains soft and improves patient comfort

The unique CleanOp™ infection prevention solution was introduced by Ecolab® over 10 years ago. Proven and approved by thousands of users every day CleanOp™ ensures that your hospital creates many improvements into its process such as:

- ▲ Improved infection prevention by optimizing fluid control and reducing the risk of cross contamination
- ▲ Improved standard of care for each patient with a consistent high quality solution
- ▲ Faster, easier and streamlined operating room cleaning procedures
- ▲ Improve turnover time of the operating room driving efficiency and patient care

Unique Mojave™ Technology

CleanOp is the only infection control system with Mojave Super Absorbent Linen giving you the outcomes that you need:

- ▲ Mojave brand Absorbent Table Linens can absorb up to 2.4L
- ▲ Absorbent properties can help to make clean up easier between cases
- ▲ Helps to protect the OR mattress

CleanOp™ - Part Overview

Part no.	Description	Qty/cs
ATC4030N	Absorbent table cover with Mojave™ technology 76 x 101 cm	50
ATC4060N	Absorbent table cover with Mojave™ technology 101 x 152 cm	50
ATC4090N	Absorbent table cover with Mojave™ technology 101 x 229 cm	50
ATC40120N-EU	Absorbent table cover with Mojave™ technology 101 x 305 cm	25
LFTSH34N	Patient Transfer sheet 86 x 168 cm	50
LFTSH80N	Patient Transfer sheet 101 x 203 cm	50
ABTSLSCN-EU	Absorbent table cover with Mojave™ technology transfer sheet, armboard covers and headrest cover	20
ABTSLSN-EU	Absorbent table cover with Mojave™ technology transfer sheet	25
ABTSLSAN-EU	Absorbent table cover with Mojave™ technology transfer sheet and armboard covers	20
AB4060LAN	Short absorbent table cover with Mojave™ technology transfer sheet and armboard covers 101 x 152 cm	25
3055NS	Absorbent floor pad 81 x 122cm	25

“CleanOp absorbent sheets protect patients and save us a lot of time cleaning the OR”

Why Microfiber?

Microfiber is less work-intensive. It virtually eliminates cross-contamination and reduces chemical and water usage while cleaning more effectively ^(*).

Why disposable Microfiber?

Microfiber cannot be laundered in industrial washers and dryers, as the heat settings can damage the material. Disposable products eliminate the risk of cross-contamination.

(*) Source: Environmental Protection Agency (EPA) Region 9 Pollution Prevention Program fact sheet, Nov. 2002

Disposable Microfiber Mops & Cloths

Effective and easy operating room cleaning

The CleanOp microfiber mops & cloths are an integral part of the EnCompass Environmental Hygiene program. Microfiber is a textile composed of extremely fine threads that are only 1/16th the diameter of a human hair. The resulting textile is absorbent, and has properties that strongly attract dust particles.

CleanOp mops & cloths have been extensively used in combination with the other components of the OR Program and enable the delivery of correct disinfectant concentration to critical surfaces. The design of the microfiber products provides superior cleaning outcomes.

Effective Cleaning

- ▲ **Reduced linting** so fewer particles are shed compared to cotton or rayon mops
- ▲ **Best for decontaminating and removing microbes** resulting in cleaner surfaces
- ▲ **Single use disposable supplies** ensure clean products for every room and meet best practices for OR cleaning
- ▲ **Even wetting of surface** improves cleaning efficiency

Easier to Use

- ▲ **90% lighter weight than standard string mop** means reduced strain on worker back and arms
- ▲ **Superior gliding characteristics** allow for ease of mopping and collection of loose debris

Part Number	Description	Qty/cs
Hardware		
92021129	EnCompass Small Cart	1
92022526	EnCompass Mop Frame with Z-Shaped Handle for Microfiber mop	1
92022536	EnCompass Sweep Set	1
Disposables

Ecolab's EnCompass OR Cart is part of a comprehensive cleaning and disinfection program to help reduce the risk of infection in the field.

When used with the EnCompass OR cart all required mops & cloths can easily be pre-saturated with disinfectant before the shift. This greatly improves staff efficiency and reduces chemical and water use.

Includes:

- ▲ 3 large buckets
- ▲ 1 large sieve top
- ▲ 2 small pails with sieve top
- ▲ 1 red measuring bucket
- ▲ Side shelf for mops
- ▲ Brackets to hold mop sticks
- ▲ Locking wheel design

Ergonomic "Z" handle and mop holder

Pour bottles and pails

Drape Armour™

Reducing scatter radiation is a critical part of the overall puzzle

Drape Armour is now available in regular and LOW configurations that answer a spectrum of needs. Offering both greater economy combined with effective protection from scatter radiation, you can now choose the Drape Armour shielding that's ideal for you.

Drape Armour and Drape Armour LOW radiation protection shields are designed to protect at the procedure site where scatter radiation is most prevalent. These shields can help to protect surgeons and other members of the clinical staff, and offer substantial attenuation as demonstrated by direct beam studies.

This means you can achieve substantial savings with Drape Armour depending upon your individual needs. Complete ratings are included in the charts on the next page to help you select the Drape Armour configuration that's just right for you.

DRAPE ARMOUR - ATTENUATION DATA

Measured at 90 kVp		
Product	Range in Lead Equivalence	Range in Attenuation
Drape Armour™	0.238 to 0.263 mm Pb	88.3% to 90.3%*

DRAPE ARMOUR LOW - ATTENUATION DATA

Measured at 90 kVp		
Product	Range in Lead Equivalence	Range in Attenuation
Drape Armour™ LOW	0.166 to 0.184 mm Pb	82.0% to 84.0%*

*Tested per ASTM F2547-06 (2013) under narrow beam conditions; Standard Test Method for determining the Attenuation Properties in a Primary X-Ray Beam of materials used to protect against Radiation generated under use of the X-Ray Equipment

Doses in Interventional Procedures			
Effect	Threshold Dose (Gy)	Minutes Fluoro At 0.02 Gy/min	Minutes Fluoro At 0.2 Gy/min
Transient Crythema	2	100	10
Permanent Epilation	7	350	35
Dry Desquamation	14	700	70
Dermal Necrosis	18	900	90
Telangiectasia	10	500	50
Cataract	>5	>250 To Eye	>25 To Eye
